# MIGRATE TO UNITE™

CELLTRAQ™ has been the reference battery monitoring and testing database application for the past decade. To provide greater scalability, more expansive enterprise management, and enhanced cyber security, Franklin Electric has developed UNITE™. UNITE™ is a sophisticated application featuring advanced data visualization tools for Franklin Electric handheld battery testers and battery monitoring systems. UNITE™ provides data storage for thousands of geographically disparate battery plants, enabling remote analysis and reporting from a centralized location.

KEY UNITE™ ADVANCEMENTS

- User customization
- Highly scalable
- Modern user interface
- Rapid data uploads
- Simplified hardware setup
- Faster performance
- Easier software updates

- Centralize your battery asset performance data
- Remotely visualize real-time battery diagnostic information
- Facilitate proactive maintenance planning
- Deploy maintenance with intelligence
- Streamline battery compliance testing and reporting
